PROFESSIONAL SUMMARY

Crypto research analyst, on-chain data specialist, and content creator with 3+ years producing institutional-grade research reports and educational content for Web3 audiences. Combines deep on-chain analytics expertise (Dune SQL, Glassnode, Arkham, TokenTerminal) with end-to-end content ownership across written reports, video, and AI-assisted research workflows. Grew and manages a 190,000+ subscriber audience; delivered research insights to 10,000+ paid subscribers at Motley Fool. Experienced across DeFi, AI, RWA, and DePIN sectors with 6 years of hands-on protocol usage across EVM, Solana, and Sui ecosystems.

EDUCATION

Clemson University

*Bachelor of Science in Materials Science & Engineering. Minor in Chemistry | Dean's List | SC
LIFE Scholarship | Honors Graduate.*

Clemson, SC
May 2016

EXPERIENCE

Crypto Research Analyst

April 2022 – August 2025

Motley Fool

- Wrote and published 50+ institutional-grade research reports on cryptocurrency investment opportunities; maintained quarterly reports and investment KPIs for approximately 50 crypto recommendations.
- Leveraged enterprise analytics platforms (The Block, Messari, Delphi Digital, TokenTerminal, Dune SQL, Arkham, Glassnode) to deliver timely research insights to 10,000+ cryptocurrency subscribers.
- Managed Motley Fool's first crypto Real Money Portfolio, Digital Explorers, growing the portfolio from \$750K to \$1.7M in a single year, making it the best-performing portfolio in company history on a year-over-year basis.
- Authored a 60-page comprehensive crypto investing guide as part of a flagship content campaign, generating \$1M+ in revenue within two weeks.
- Developed long-term content series and educational campaigns in partnership with research and marketing teams; produced video guides, masterclasses, and news updates that strengthened the organization's public voice on crypto topics.
- Collaborated with external AI contractors to develop Motley Fool's first AI-powered digital asset database, Crypto Ball, with responsibilities centered on data aggregation and sourcing.
- Built an in-house AI research application to automate the quarterly reporting process, incorporating chain prompting, a data cleaning pipeline, and OCR analysis to streamline and standardize outputs.
- Built on-chain analytics dashboards using Dune SQL to surface new data-driven insights for the research team.

Owner

August 2019 – Present

Kazebeat LLC

Irmo, SC

- Generated and published 1,500+ pieces of video content, blog-style posts, and copy across social media platforms, accumulating 10+ million organic views on educational crypto-focused content.
- Built a social media presence of 190,000 followers across TikTok, YouTube, Instagram, and X through compelling storytelling and organic, purpose-driven content (TikTok: @kazebeat).
- Generated 750k views with a 6% engagement rate solely through automated AI-generated content workflows between May 2026 - July 2026.
- Onboarded 2,000+ users onto crypto products through paid partnerships with OKX, CoolWallet, and Big Time Studios, converting audience reach into measurable platform adoption.
- Independently investigated and conducted due diligence on 30+ digital assets across DeFi, AI, RWA, and DePIN landscapes to produce actionable research insights for crypto audiences.
- Developed long-term content strategies and audience growth initiatives; collaborated with KOL networks, including M6 Group of 60+ creators and investors, to evaluate opportunities, assess risks, and generate trustworthy educational material.
- Manage a Discord server of 300+ members focused on cryptocurrency research and education, helping members navigate complex topics and distinguish signal from noise in the ecosystem.

Structural Steel Engineer

October 2016 – August 2019

SCDOT Office of Materials & Research

Columbia, SC

- Oversaw roadway and bridge construction projects ranging from \$10K to \$15M; coordinated across contractors, material suppliers, and SCDOT departments to ensure safety, timeliness, and cost control.
- Authored an analytical research paper on galvanized steel in concrete bridges; findings led to the decision not to adopt galvanized steel across all bridges, saving SCDOT approximately 20% in rebar material costs.
- Conducted tensile stress tests on rebar samples and analyzed stress-strain curves against third-party testing data to verify quality and specification adherence.

CERTIFICATIONS

- 6 years of hands-on DeFi protocol experience across EVM, Solana, and Sui ecosystems
- 10+ years of cryptocurrency investing, research, and trading
- E.I.T. - SC State Board of Registration, Certification No. 20525
- AWS Certified Cloud Practitioner
- Certified SolidWorks Associate
